

Quant User Guide

March 15, 2018

Version v4.1.1932

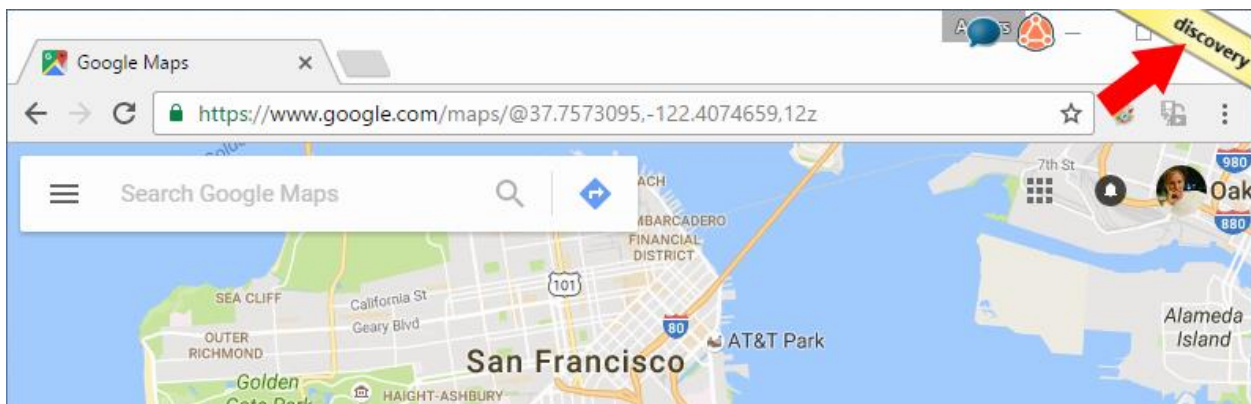

Initiate sharing from window

Each window has a blue Quant icon in the header. Click the icon to initiate sharing

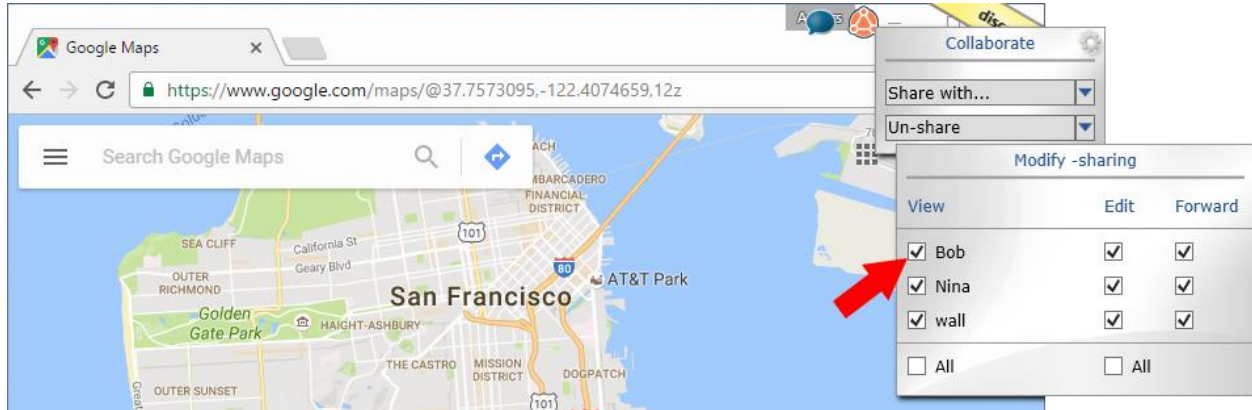

Label indicate if window is shared

Once a window is visible to others its clearly identified by a label

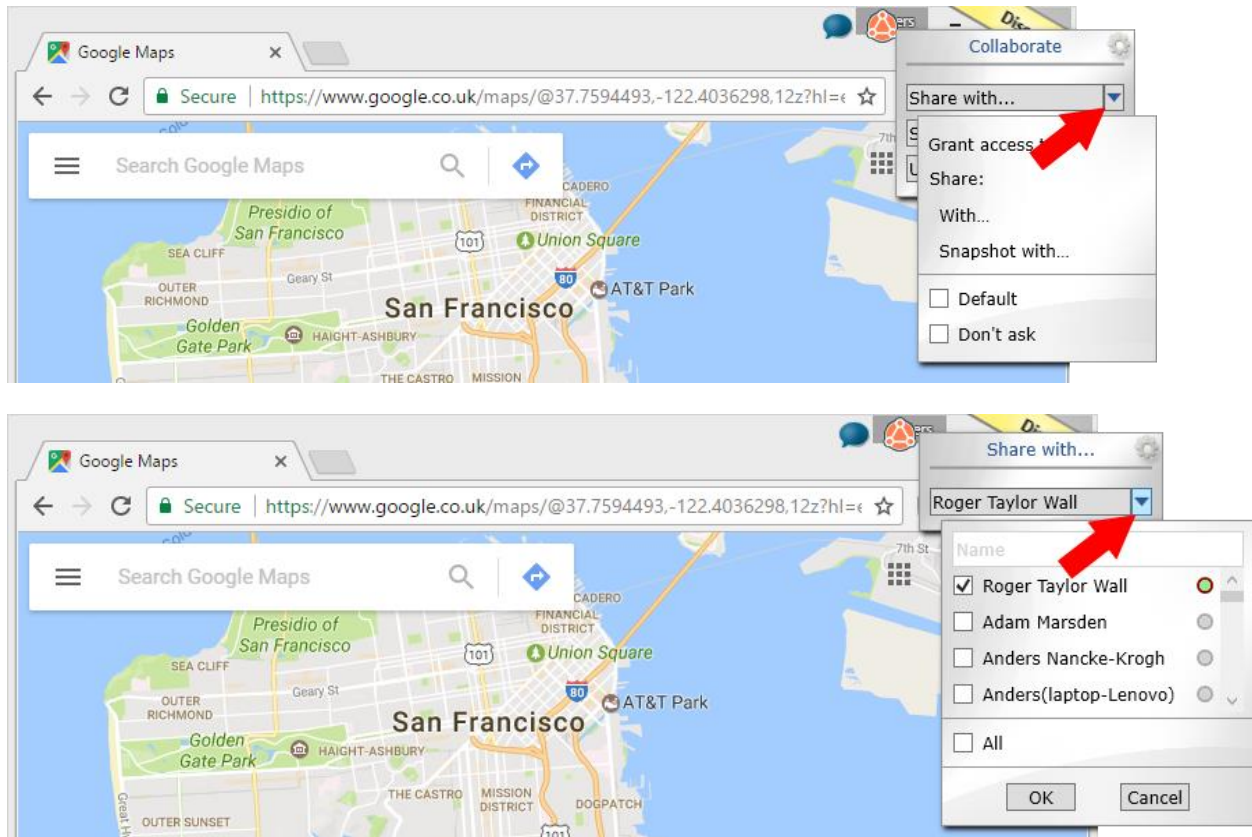

Stop / modify sharing

To stop or modify sharing, click the blue icon again. Click “Un-share” to stop sharing (all is impacted). Click pop-down to modify window permissions or individual sharing to each individual participant.

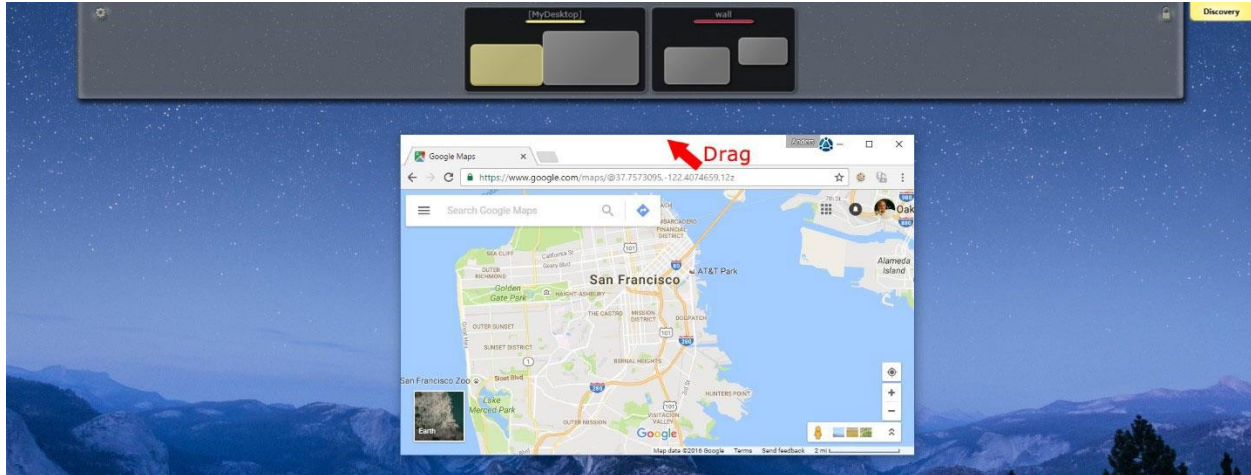

Add participants to existing sharing

To add new participants to an existing sharing click the blue icon again and click share.

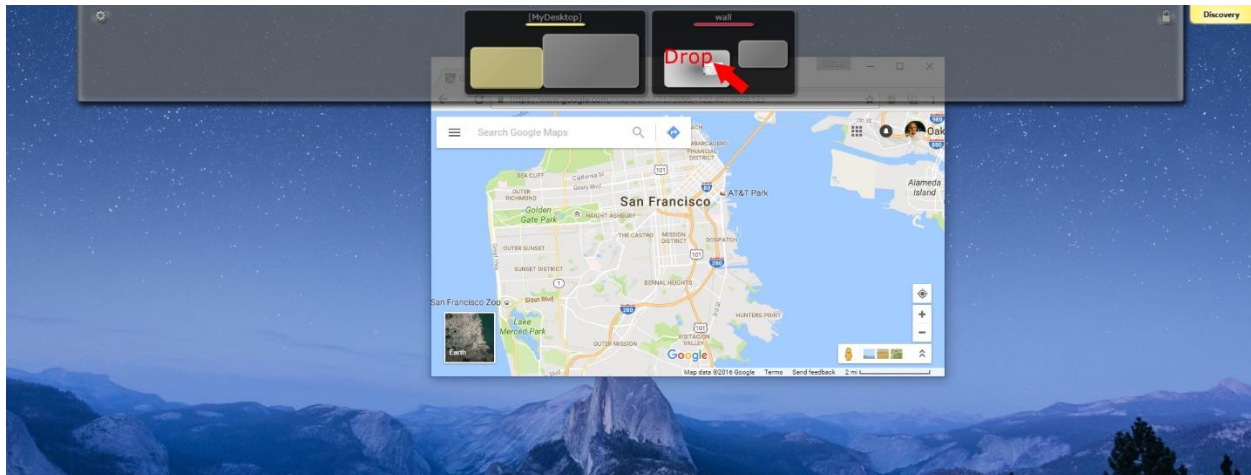

Drag & Drop windows via Navigation curtain

Drag the window over the Top-Center of the monitor. This will trigger the navigation curtain to appear.

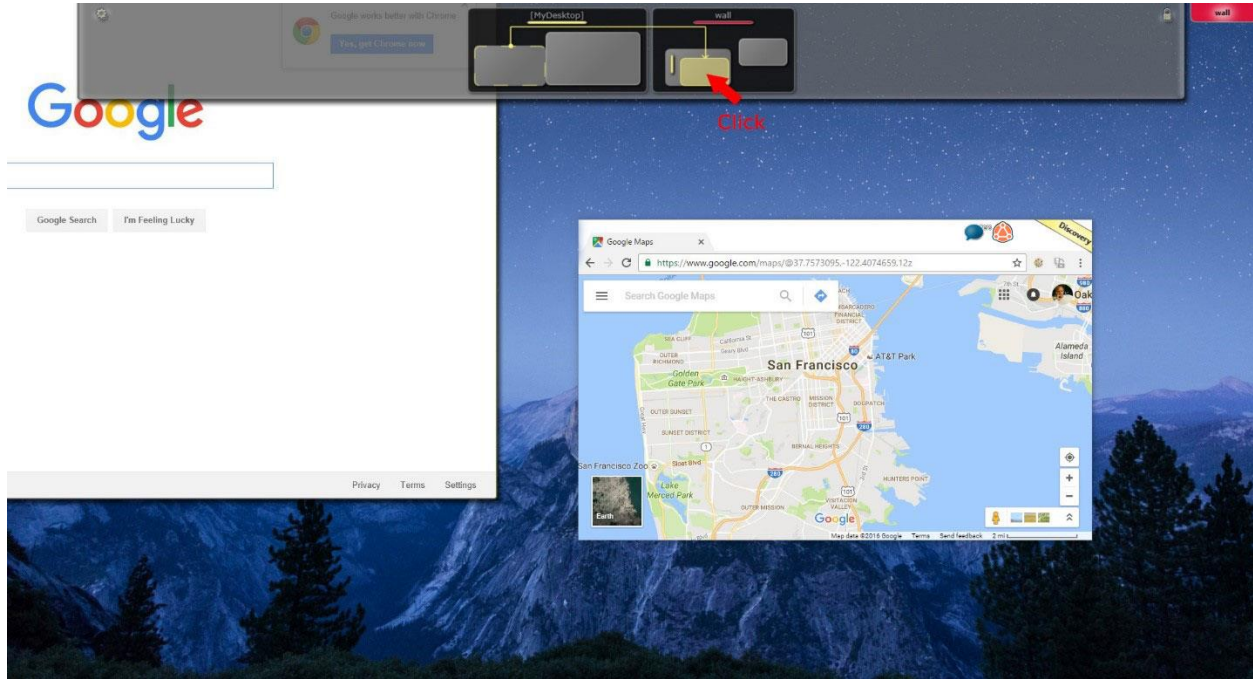

Drop the window over the desktop it should be placed on

View another desktop

Move mouse over Top-Left center of the monitor to trigger the Navigation Curtain to show. Click on the desktop you want to see

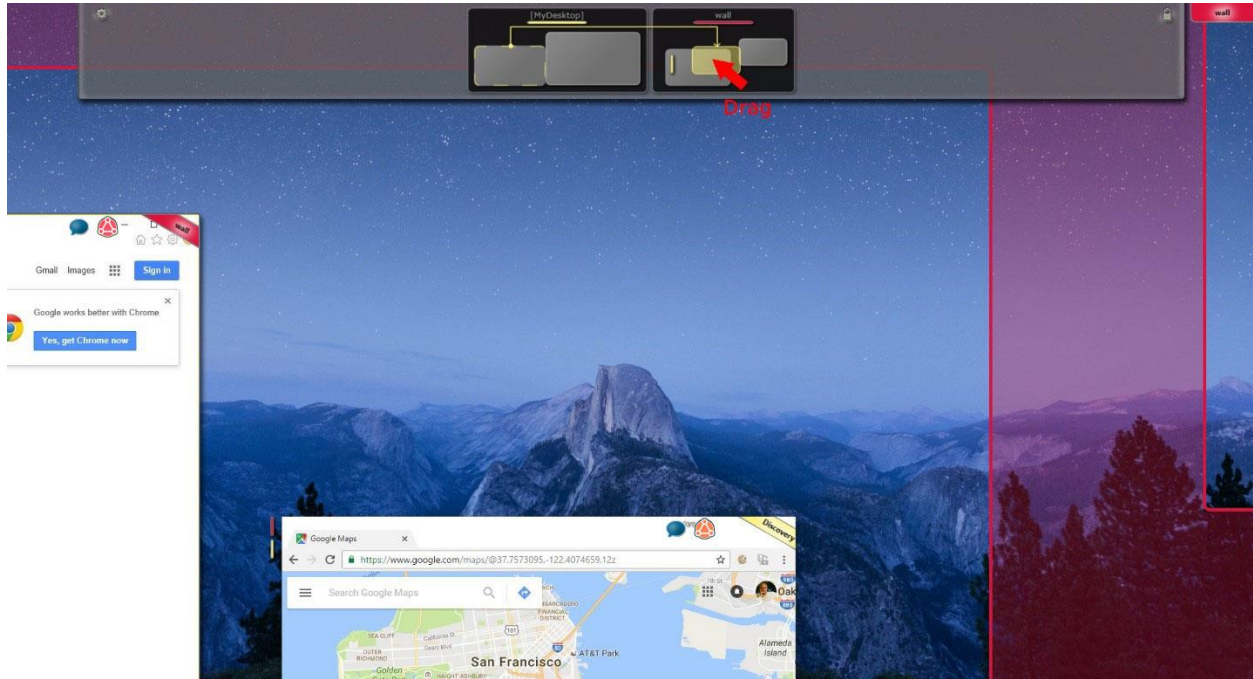

The 'view indicator' in Top-Right corner show the name of the desktop currently viewed

Each window show the owner of the window in the Top-Right corner, and the viewers of the window along the left side of the window

Drag view

When viewing a desktop larger than your monitor, drag the view with mouse/touch from the navigation curtain

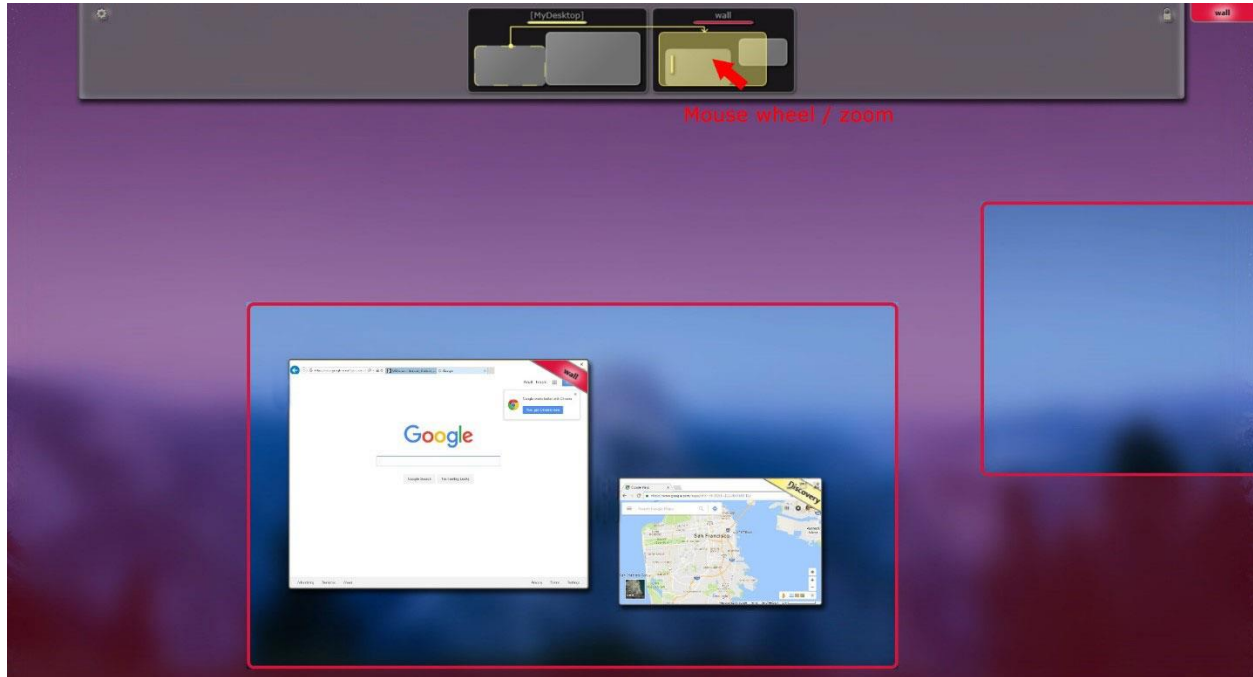

If the monitor support touch, alternatively hold down **CTRL+SHIFT** on the keyboard and drag directly on the monitor.

An outline of the host-desktop's monitors is shown while dragging.

Zoom view

To get an overview of a large desktop or to zoom in on a specific detail, move mouse over the desktop view indicator in the navigation curtain and scroll the mouse-wheel.

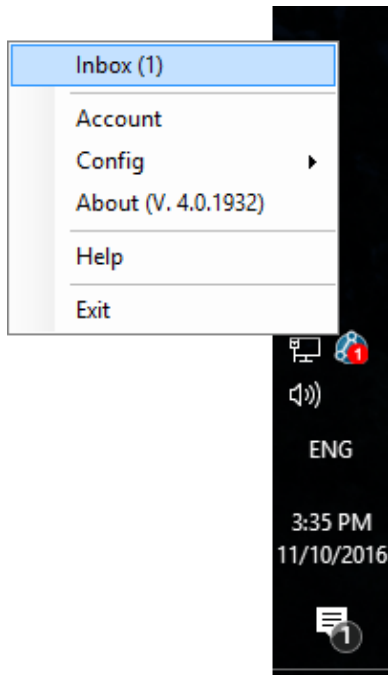

Alternatively, pinch and zoom using touch on the view-indicator

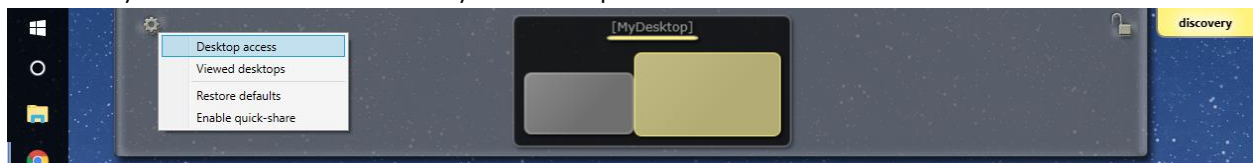

Alternatively, hold down **CTRL+SHIFT** while zoom-pinch director on the touch-screen

Windows inbox

If another user is sending a window link to your desktop it will by default be placed in your window-inbox. This is accessible from the blue icon in the system-tray

It is possible to allow specific users to drop windows directly on your desktop, without any prompts. Pull down the Navigation Curtain from Top-Center trigger on the monitor, click the 'gear' icon and choose the users you want to allow access to your desktop

NOTE: allowing a user access to your desktop does NOT mean they can see your windows. It only means they can drop windows onto your desktop without permissions. This is useful during meetings or for video-walls
